PRESS RELEASE **For Immediate Release**

GENTING PLANTATIONS REPORTS THIRD QUARTER 2026 FINANCIAL RESULTS

KUALA LUMPUR, Nov 25 – Genting Plantations Berhad today reported its financial results for the third quarter ("3Q 2026") and first nine months of the year ("YTD 2026") ended 30 September 2026.

The Group recorded higher revenue for 3Q 2026 and YTD 2026 compared to the corresponding period last year, underpinned by higher Fresh Fruit Bunch ("FFB") production and improved sales volumes in the Downstream Manufacturing segment.

The Group's achieved crude palm oil price in 3Q 2026 and YTD 2026 were RM3,881 per metric tonne ("mt") and RM3,762 per mt respectively, whilst palm kernel price in 3Q 2026 and YTD 2026 were RM3,344 per mt and RM3,334 per mt respectively.

FFB production in 3Q 2026 and YTD 2026 increased year-on-year, mainly attributable to higher cropping trends across certain estates within the Group and recovery following the unusually heavy rainfall and flooding experienced in 2025.

The Plantation segment's EBITDA increased year-on-year in 3Q 2026 and YTD 2026, supported by higher FFB production.

EBITDA for the Property segment was lower year-on-year in 3Q 2026, reflecting lower revenue and sales during the quarter. Similarly, YTD 2026 EBITDA was lower year-on-year, as the corresponding period in the previous year benefited from a higher gain arising from the sale of land.

The AgTech segment recorded an LBITDA in 3Q 2026 mainly due to higher research and development expenses. Nevertheless, the segment recorded lower losses for YTD 2026 year-on-year, mainly attributable to higher profit contributions from its seed sales.

The Downstream Manufacturing segment's EBITDA in 3Q 2026 was lower year-on-year due to lower margin. Notwithstanding this, EBITDA for YTD 2026 was higher compared with the corresponding period last year, contributed by improved margins and increased sales volume during the first half of 2026.

The Group's prospects for the rest of the year will track the performance of its mainstay Plantation segment, which is in turn dependent principally on the movements in palm products prices and the Group's FFB production.

The Group expects palm oil prices to remain under some near-term downward pressure, mainly due to higher palm oil production and elevated stock levels, coupled with the recent correction in crude oil prices. Nevertheless, the current price weakness is expected to be temporary and partly mitigated by stronger Indonesian biodiesel demand, as well as the potential impact of the severe El Niño phenomenon experienced recently, which is expected to constrain industry-wide palm oil production for the next two years.

On the production front, the Group expects the effects of the severe El Niño phenomenon to begin setting in during the remaining months of the year, with some moderation in FFB production expected towards the year-end. Nevertheless, the progression of existing mature areas into higher-yielding age profiles across some estates is expected to provide some support to production and partially mitigate the impact.

Despite ongoing geopolitical tensions and fluctuating construction costs, the Group's Property segment continues to advance its developments within the Johor-Singapore Special Economic Zone ("JS-SEZ") through prudent cost controls, proactive marketing, and careful execution. Fresh off winning the StarProperty Awards 2026 - Jewels of Johor for Best Comprehensive Township (Above 2,000 acres), the segment continues to align launches with market conditions, introducing new U.Reka property offerings in Bandar Genting Indahpura on the back of strong demand for earlier phases. Simultaneously, following the launch of the Johor Tech Smart City ("JTSC") in June 2026, site preparation and road access infrastructure are progressing rapidly at its 500-acre AgTech Campus. The Group is also solidifying its partnership with Huawei Technologies ("Huawei") via a master planning agreement for JTSC—bringing Huawei's smart campus expertise, AI-enabled master planning, and technological capabilities to the development of Knowledge AI Campus. Meanwhile, JTSC's Intelligent Industrial Park for advanced manufacturing facilities has already attracted strong investor interest. The Group's Premium Outlets® continue to enhance their tenant mix, with a Phase 2 expansion of Genting Highlands Premium Outlets® in the pipeline to anchor tenant growth, new brand additions, and an elevated experience for discerning shoppers.

The AgTech segment will continue to drive innovation through the application of artificial intelligence, data analytics and genomic research to develop high-performing planting materials and sustainable biological solutions. In line with the Group's vision for technology-driven agriculture, the segment continues to leverage its agricultural technology capabilities and global partnerships to accelerate the development of its AgTech Campus within JTSC. While the Property segment progresses with the infrastructure development works, the AgTech segment is concurrently focused on developing and implementing smart farming solutions to demonstrate the Group's capabilities in advancing food security through research and development, breeding, quality inputs and scalable crop production.

The Downstream Manufacturing segment is expected to continue facing margin pressure amid persistent excess refining capacity, as well as competition from Indonesian counterparts. Meanwhile, the segment's palm-based biodiesel is expected to continue catering mainly to the Malaysian biodiesel mandate, with the higher blending requirement supporting domestic demand and utilisation levels. While rising energy prices could provide support to palm oil prices, benefiting the Group's upstream Plantation business, the associated increase in energy costs, coupled with tightness in the supply of processing chemicals, may continue to exert pressure on the Downstream Manufacturing segment's margins.

A summary of the quarterly results is shown in Table 1.

About Genting Plantations Berhad

Genting Plantations, a subsidiary of Genting Berhad, commenced operations in 1980. It has a landbank of approximately 64,100 hectares in Malaysia and about 179,100 hectares (including the *Plasma* scheme) in Indonesia. It owns seven oil mills each in Malaysia and Indonesia, with a combined milling capacity of 765 metric tonnes per hour. In addition, the Group has ventured into the manufacturing of downstream palm-based products.

Genting Plantations has also diversified into property development to unlock the value of its strategically located landbank and has invested significantly in agriculture technology to provide total solutions and services to the Group's core agri-business in optimising yield, improving operating efficiency, enabling traceability and enhancing sustainability.

GENTING PLANTATIONS BERHAD
NOTES TO THE INTERIM QUARTERLY FINANCIAL REPORT
- THIRD QUARTER ENDED 30 SEPTEMBER 2026

(I) Compliance with Malaysian Financial Reporting Standard ("MFRS") 134: Interim Financial Reporting

(a) Accounting Policies, Presentation and Methods of Computation

The interim financial report is unaudited and has been prepared in accordance with MFRS 134 "Interim Financial Reporting" and paragraph 9.22 of Bursa Malaysia Securities Berhad ("Bursa Securities") Listing Requirements.

The interim financial report should be read in conjunction with the audited financial statements of the Group for the financial year ended 31 December 2025. The material accounting policies, presentation and methods of computation adopted for the interim financial report are consistent with those adopted for the annual audited financial statements for the financial year ended 31 December 2025 except for the adoption of amendments to published standard for the Group for the financial year beginning 1 January 2026:

- Amendments to MFRS 9 and MFRS 7 on amendments to the classification and measurement of financial instruments
- Amendments to MFRS 9 and MFRS 7 on contracts referencing nature-dependent electricity
- Annual Improvements to MFRS accounting standards for enhanced consistency

The adoption of these amendments to published standards did not have any material impact on the interim quarterly financial report of the Group.

(b) Seasonal or Cyclical Factors

Fresh fruit bunches ("FFB") production is seasonal in nature. Production of FFB normally peaks in the second half of the year but this cropping pattern can be affected by changes in weather conditions.

(c) Unusual Items Affecting Assets, Liabilities, Equity, Net Income or Cash Flow

There were no unusual items affecting the assets, liabilities, equity, net income or cash flows of the Group for the nine months ended 30 September 2026.

(d) Material Changes in Estimates

There were no material changes made in estimates of amounts reported in the previous financial year.

(e) Changes in Debt and Equity Securities

(i) Issuance of Islamic medium term notes

On 31 July 2026, the Company's wholly-owned subsidiary, Genting Property Sdn Bhd via its wholly-owned subsidiary, Bina Restu Berhad had successfully undertaken its first issuance of RM200.0 million in nominal value of Islamic medium term notes ("Sukuk Murabahah") under the Sukuk Murabahah Programme of RM2.0 billion in nominal value under the Shariah principle of Murabahah (via Tawarruq arrangement).

The Sukuk Murabahah has a tenure of five (5) years and is unrated.

***(e) Changes in Debt and Equity Securities** (Continued)*

(ii) Purchase of shares pursuant to Section 127 of Companies Act 2016

During the nine months ended 30 September 2026, the Company had acquired 108,300 ordinary shares from the open market for a total consideration of RM584,610. The share buy-back was made pursuant to the approval obtained from the Company's shareholders at the Company's Annual General Meeting held on 9 June 2026. The repurchased shares are held as treasury shares in accordance with the requirements of Section 127(4) of the Companies Act 2016.

Other than the above, there were no other issuance, cancellation, repurchase, resale or repayment of debts or equity securities for the nine months ended 30 September 2026.

(f) Dividends Paid

Dividends paid during the nine months ended 30 September 2026 are as follows:

		RM'Mil
(i)	Special single-tier dividend paid on 30 March 2026 for the financial year ended 31 December 2025 - 14.0 sen per ordinary share	125.6
(ii)	Final single-tier dividend paid on 30 March 2026 for the financial year ended 31 December 2025 - 4.0 sen per ordinary share	35.9
(iii)	Interim single-tier dividend paid on 25 September 2026 for the financial year ending 31 December 2026 - 10.0 sen per ordinary share	89.7
		251.2

(g) Segment Information

The segments are reported in a manner that is consistent with the internal reporting provided to the chief operating decision maker whereby the Group's business is considered based on the nature of the products and services, specific expertise and technology requirements of individual reportable segments. The performance of the operating segments is based on a measure of adjusted earnings/(losses) before interest, tax, depreciation and amortisation ("Adjusted EBITDA/(LBITDA)"). Items not forming part of the adjusted EBITDA/(LBITDA) include net fair value gain or loss on financial assets, gain or loss on disposal of property, plant and equipment, net surplus arising from Government acquisition, assets written off, impairment losses, reversal of previously recognised impairment losses and other non-recurring items, if any.

(h) Property, Plant and Equipment

During the nine months ended 30 September 2026, acquisitions of property, plant and equipment by the Group was RM282.0 million.

(i) Material Events Subsequent to the End of Financial Period

There were no material events subsequent to the nine months ended 30 September 2026 that have not been reflected in this interim quarterly financial report.

(j) Changes in the Composition of the Group

Genting AgTech Ventures Sdn Bhd, a wholly-owned subsidiary of the Company, had on 4 May 2026 disposed of its joint control stake in Green World Genetics Sdn Bhd ("GWG") for a consideration of RM32.15 million. Following the completion of the disposal on 4 May 2026, GWG and its four wholly-owned subsidiaries, namely Leckat Corporation Sdn Bhd, GWG Fresh Sdn Bhd, GWG E-Commerce Sdn Bhd and GWG Maize Sdn Bhd, ceased to be joint ventures of the Group.

Other than the above, there were no other material changes in the composition of the Group for the nine months ended 30 September 2026.

(k) Changes in Contingent Liabilities or Contingent Assets

There were no material changes in contingent liabilities or contingent assets since the last financial year ended 31 December 2025.

(l) Capital Commitments

Authorised capital commitments not provided for in the interim condensed financial statements as at 30 September 2026 are as follows:

	RM'000

(n) Fair Value of Financial Instruments

The Group uses the following hierarchy for determining the fair value of all financial instruments carried at fair value:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.
Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

As at 30 September 2026, the Group's financial instruments measured and recognised at fair value on a recurring basis are as follows:

RM'000	Level 1	Level 2	Level 3	Total
Financial assets				
Financial assets at FVTPL	360	-	-	360
Financial assets at FVOCI	5,688	-	2,267	7,955

***(1) Performance Analysis** (Continued)*

The Group recorded higher revenue for the quarter ended 30 September 2026 ("3Q 2026") and the first nine months of 2026 ("YTD 2026") compared to the corresponding period last year. This was underpinned by higher Fresh Fruit Bunch ("FFB") production and improved sales volumes in the Downstream Manufacturing segment.

FFB production in 3Q 2026 and YTD 2026 increased year-on-year, mainly attributable to higher cropping trends across certain estates within the Group and recovery following the unusually heavy rainfall and flooding experienced in 2025.

Malaysian crude palm oil ("CPO") prices remained firm in 3Q 2026, supported by expectations of stronger biodiesel demand following Indonesia's implementation of its B50 mandate from July 2026, firm energy prices amid geopolitical tensions and concerns over the potential impact of a strong El Niño event on future production. However, price gains were capped by rising Malaysian palm oil inventories and weaker export demand. Meanwhile, the increase in the export levy rate and uncertainty arising from the announcement of Indonesia's export centralisation policy led to a wider discount of Indonesian CPO prices against Malaysian prices.

Accordingly, the Group's achieved CPO price in 3Q 2026 was higher y-o-y. However, the YTD 2026 achieved CPO price was lower compared with the corresponding period last year, when prices were elevated in the first half of 2025 amid expectations of tighter exportable supplies. Meanwhile, the Group's achieved palm kernel ("PK") price remained broadly comparable y-o-y.

	Current Quarter			Year-To- Date		
	2026	2025	Change %	2026	2025	Change %
Average Selling Price (RM/MT)						
o CPO	3,881	3,779	*+3*	3,762	3,899	*-4*
o PK	3,344	3,294	*+2*	3,334	3,336	-
Production (MT'000)						
o FFB	595	523	*+14*	1,612	1,457	*+11*

The Plantation segment's EBITDA increased year-on-year in 3Q 2026 and YTD 2026, supported by higher FFB production.

EBITDA for the Property segment was lower year-on-year in 3Q 2026, reflecting lower revenue and sales during the quarter. Similarly, YTD 2026 EBITDA was lower year-on-year, as the corresponding period in the previous year benefited from a higher gain arising from the sale of land.

The AgTech segment recorded an LBITDA in 3Q 2026 mainly due to higher research and development expenses. Nevertheless, the segment recorded lower losses for YTD 2026 year-on-year, mainly attributable to higher profit contributions from its seed sales.

The Downstream Manufacturing segment's EBITDA in 3Q 2026 was lower year-on-year due to lower margin. Notwithstanding this, EBITDA for YTD 2026 was higher compared with the corresponding period last year, contributed by improved margins and increased sales volume during the first half of 2026.

The "Others" category reflects foreign exchange movements on the Group's US Dollar-denominated cash reserves and borrowings.

The Group's profit before tax for 3Q 2026 was lower compared to the immediate preceding quarter, mainly attributable to lower contributions from the Property and Downstream Manufacturing segments. Additionally, 2Q 2026 also featured higher profit realised on brought forward inventory for the Plantation segment.

(3) Prospects

The Group's prospects for the rest of the year will track the performance of its mainstay Plantation segment, which is in turn dependent principally on the movements in palm products prices and the Group's FFB production.

The Group expects palm oil prices to remain under some near-term downward pressure, mainly due to higher palm oil production and elevated stock levels, coupled with the recent correction in crude oil prices. Nevertheless, the current price weakness is expected to be temporary and partly mitigated by stronger Indonesian biodiesel demand, as well as the potential impact of the severe El Niño phenomenon experienced recently, which is expected to constrain industry-wide palm oil production for the next two years.

On the production front, the Group expects the effects of the severe El Niño phenomenon to begin setting in during the remaining months of the year, with some moderation in FFB production expected towards the year-end. Nevertheless, the progression of existing mature areas into higher-yielding age profiles across some estates is expected to provide some support to production and partially mitigate the impact.

Despite ongoing geopolitical tensions and fluctuating construction costs, the Group's Property segment continues to advance its developments within the Johor-Singapore Special Economic Zone ("JS-SEZ") through prudent cost controls, proactive marketing, and careful execution. Fresh off winning the StarProperty Awards 2026 - Jewels of Johor for Best Comprehensive Township (Above 2,000 acres), the segment continues to align launches with market conditions, introducing new U.Reka property offerings in Bandar Genting Indahpura on the back of strong demand for earlier phases. Simultaneously, following the launch of the Johor Tech Smart City ("JTSC") in June 2026, site preparation and road access infrastructure are progressing rapidly at its 500-acre AgTech Campus. The Group is also solidifying its partnership with Huawei Technologies ("Huawei") via a master planning agreement for JTSC—bringing Huawei's smart campus expertise, AI-enabled master planning, and technological capabilities to the development of Knowledge AI Campus. Meanwhile, JTSC's Intelligent Industrial Park for advanced manufacturing facilities has already attracted strong investor interest. The Group's Premium Outlets® continue to enhance their tenant mix, with a Phase 2 expansion of Genting Highlands Premium Outlets® in the pipeline to anchor tenant growth, new brand additions, and an elevated experience for discerning shoppers.

The AgTech segment will continue to drive innovation through the application of artificial intelligence, data analytics and genomic research to develop high-performing planting materials and sustainable biological solutions. In line with the Group's vision for technology-driven agriculture, the segment continues to leverage its agricultural technology capabilities and global partnerships to accelerate the development of its AgTech Campus within JTSC. While the Property segment progresses with the infrastructure development works, the AgTech segment is concurrently focused on developing and implementing smart farming solutions to demonstrate the Group's capabilities in advancing food security through research and development, breeding, quality inputs and scalable crop production.

The Downstream Manufacturing segment is expected to continue facing margin pressure amid persistent excess refining capacity, as well as competition from Indonesian counterparts. Meanwhile, the segment's palm-based biodiesel is expected to continue catering mainly to the Malaysian biodiesel mandate, with the higher blending requirement supporting domestic demand and utilisation levels. While rising energy prices could provide support to palm oil prices, benefiting the Group's upstream Plantation business, the associated increase in energy costs, coupled with tightness in the supply of processing chemicals, may continue to exert pressure on the Downstream Manufacturing segment's margins.
